Dear Sir/ Ma'am !

I have done Engineering in Computer Science from Scope College of Engineering, And have just completed a Software engineering course from AttainU. I am writing to express my strong interest in being a Full Stack Developer and work with you. As my coursework progresses, I find my curiosity and passion for the subject growing rapidly

During my course at AttainU, I have been tasked with the opportunity to hone my skills in the **MERN** stack. With this knowledge, I can design and develop end-to-end fully functional front-end applications using React/Redux and also implement backend using Node.JS and Express.JS. I have also developed skills with regards to HTML and Bootstrap and how to use Google Oauth, Parse-Server, etc. I am also familiar with browser built-in local storage for front-end apps. I have committed myself to continuous learning and improve upon existing skill-set and also learn new skills when the need arises.

I am currently available for an interview scheduled at the convenience of your company. I have attached my resume detailing my academic knowledge and my technical skills. I would appreciate the chance to discuss any possible opportunities within your Company and to provide you with further information.

Your time and consideration are greatly appreciated. I am looking forward to hearing from you soon.

Sincerely
Deepak Shrivastava
